EXCELS IN BEAUTY.

THE PAN-AMERICAN EXPOSITION CITY

Harmony of Architectural, Sculp-tural, Horticultural, Floral, Elec-trical and Color Effects—Progress of a Century to Be Illustrated.

The Pan-American may not be as big as some former expositions, but it will be proved the property of the Exposition site is a commanding one, containing 350 acres adjoining Buffalo's lovely and expansive Delaware Park. In selecting the Spanish Renaissance style of architecture as a basis for the Exposition architects to work upon, the managers paid a compliment to the Latin-American vided for an effect of surpassing grandeur. The style has been somewhat modernized in its treatment, with the result of enhanced beauty. Color is judiciously applied to relieve the staff covered structures of the blank monotony which has characterized former exposition cities. It is rich, charming of color decoration of buildings. The prismatic splendor has evoked the term "Rathow City" for the ensemble of Exposition palaces. Sculpture will add to the attractiveness. Majestic statues and costly groups will adorn domes and towers and guard the entrances to buildings. There will be the Exposition City, the work of the best sculptors of the country, under the direction of Karl Bitter.

The court settings will be superb. The principal courts are the Court of Fountains and Plaza, which form a north and south perspendicular and foral embellishments of the grounds.
